Difficulty: Beginner

Course Duration: 4 Hours

## RESTful Services: Fundamentals

## About this course:

Representational State Transfer (REST) is an architecture that defines a set of constraints to be used for creating web services. The web services that are compliant to REST architecture are known as RESTful services. The main distinction of RESTful services is that they provide interoperability between computer systems on the internet. This course covers the fundamental concepts of RESTful services and enables the students to understand the usage and characteristics of REST architecture.

This course gives the students an overview of RESTful Services, as well as teaches them about paths, injection, sub resources, response, form, and exceptions. These fundamental concepts are essential for any web services developer to create RESTful web services. The course can help the students kick start their career in the field of web services development.

The average salary of an API Developer is **\$109,716** per year.

## Course Objective:

- Get an overview of the RESTful services
- Get introduced to JAX-RS
- Learn about path matching
- Understand paths and annotations
- Understand injection and sub resources
- Get an overview of response builder, form submission and exceptions

## Audience:

- Front-end and Back-end developers
- Java programmers
- Developers of RESTful web services

## Prerequisite:

- The course has no formal pre-requisites. However, students with software engineering background will find it easier to grasp the concepts taught in this course.

## Course Outline:

### Chapter 01 - Overview and Paths

- Topic A: Overview - Part 1
- Overview - Part 2
- Overview - Part 3
- Topic B: Overview Continued - Part 1
- Overview Continued - Part 2
- Overview Continued - Part 3

- Topic C: Introduction to JAX-RS - Part 1
- Introduction to JAX-RS - Part 2
- Introduction to JAX-RS - Part 3
- Topic D: Path Matching - Part 1
- Path Matching - Part 2
- Path Matching - Part 3
- Topic E: Paths and Annotations - Part 1
- Paths and Annotations - Part 2
- Paths and Annotations - Part 3
- Review - Question

## **Chapter 02 - Injection and Sub Resources**

- Topic A: Life Cycle - Part 1
- Life Cycle - Part 2
- Life Cycle - Part 3
- Topic B: Injection - Part 1
- Injection - Part 2
- Injection - Part 3
- Topic C: Sub Resources - Part 1
- Sub Resources - Part 2
- Sub Resources - Part 3
- Topic D: Sub Resources Continued - Part 1
- Sub Resources Continued - Part 2
- Sub Resources Continued - Part 3
- Review - Question

## **Chapter 03 - Response, Form and Exceptions**

- Topic A: Response Builder - Part 1
- Response Builder - Part 2
- Response Builder - Part 3
- Topic B: Form Submission - Part 1
- Form Submission - Part 2
- Form Submission - Part 3
- Topic C: Exceptions - Part 1
- Exceptions - Part 2
- Exceptions - Part 3
- Review - Question

## **Credly Badge:**

**Display your Completion Badge And Get The Recognition You Deserve.**

Add a completion and readiness badge to your LinkedIn profile, Facebook page, or Twitter account to validate your professional and technical expertise. With

badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise
- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through Credly.
