**Course Duration:** 5 Days

## Red Hat Identity Management and Active Directory Integration (RH362VT)

### About this course:

#### Configure and manage Red Hat Identity Management (IdM)

Red Hat Security: Identity Management and Active Directory Integration (RH362)

provides the skills to configure and manage IdM, the comprehensive Identity Management solution bundled with Red Hat® Enterprise Linux.

***This course is based on Red Hat Identity Manager 4.5 (bundled with RHEL), Red Hat Enterprise Linux 7.4, Microsoft Windows Server 2016, Red Hat Satellite 6.3, Red Hat Ansible Tower 3.2.2, and Red Hat Ansible 2.5.***

This course teaches you skills on the most requested Red Hat Identity Management (IdM) capabilities, including Active Directory trusts, multi-product federation, configuration management with Ansible, integrated certificate management, single sign-on, one-time passwords, and cybersecurity policy conformance.

## **Course Objective:**

- Install Red Hat Identity Management servers, replicas, and clients.
- Configure and manage Kerberos authentication and secure services.
- Create and manage a trust relationship with Microsoft Active Directory.
- Configure highly secure user authentication—local and remote—including two-factor authentication.
- Manage secrets, vaults, certificates, and keys.
- Troubleshoot identity management processes.
- Integrate Satellite 6 with IdM.
- Integrate Tower with IdM.
- Configure IdM backup and recovery.

## **Audience:**

- Red Hat Certified System Administrator (RHCSA) who wants to learn how to provision and configure IdM technologies across both Linux and Windows applications
- Identity management specialist or engineer
- Access management specialist or engineer
- Web application developer
- DevOps specialist

## **Prerequisite:**

- Be certified as a Red Hat Certified System Administrator (RHCSA) (required)
- Be certified as a Red Hat Certified Engineer (RHCE) (recommended, but not required)

## **Course Outline:**

### **Install Red Hat Identity Management**

Describe and install Red Hat Identity Management (IdM).

### **Centralize Identity Management**

Explain the IdM server services, explore IdM clients access methods, and install an IdM client.

### **Authenticate identities with Kerberos**

Define the Kerberos protocol and configure services for Kerberos authentication.

### **Integrate IdM with Active Directory**

Create a trust relationship with Active Directory.

### **Control user access**

Configure users for authorized access to services and resources.

### **Manage a public key infrastructure**

Manage certificate authorities, certificates, and storing secrets.

### **Maintain IdM operations**

Troubleshoot and recover Identity Management.

### **Integrate Red Hat products with IdM**

Configure major services to share the IdM authentication database.

### **Install scalable IdM**

Construct a resilient and scalable Identity Management topology.

## **Credly Badge:**

### **Display your Completion Badge And Get The Recognition You Deserve.**

Add a completion and readiness badge to your LinkedIn profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise
- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through Credly.
