Learning Style: Virtual Classroom

Technology: Cisco

Difficulty: Intermediate

Course Duration: 2 Days

Troubleshooting the Cisco ACI Fabric (ACITS)

About this course:

Classic data centers integrate many different components from many different environments, creating a very complex and decentralized approach to troubleshooting application deployment. Just as ACI allows for centralized management focused on application needs, you can troubleshoot your ACI Fabric from a centralized location with the requirements of the application in mind. This two-day Cisco ACI training will introduce you to common ACI troubleshooting

practices. You will use the ACI GUI and show commands in the CLI to identify faults in this Cisco ACI troubleshooting course. You will troubleshoot FA policies, app profiles, VMM domains, L3 OUT, and contracts, as well as analyze health scores to determine the current condition of the Fabric. This Cisco ACI troubleshooting training will help you be able to identify faults and determine current condition of faults in order to determine the appropriate next step. Learn more below.

Course Objective:

Upon completing this course, the learner will be able to meet these overall objectives:

- Troubleshoot interface policies
- Troubleshoot switch profiles
- Troubleshoot VRFs
- Troubleshoot Bridge domains
- Troubleshoot EPGs
- Troubleshoot Vswitch policy
- Troubleshoot VMM domain integrations
- Troubleshoot VLAN pools
- Troubleshoot VM connectivity
- Troubleshoot OSPF interface policy
- Troubleshoot OSPF neighbor relationship
- Troubleshoot Advertising subnets
- Troubleshoot protocol filters
- Troubleshoot contracts between tenants

Audience:

The primary audience for this course is as follows:

- Field engineers
- Support engineers
- Server administrators
- Network administrators
- Storage administrators

Prerequisite:

The knowledge and skills that the learner should have before attending this course are as follows:

- ICND1: Interconnecting Cisco Networking Devices, Part 1 v3.0 or equivalent experience or knowledge
- Server virtualization knowledge

Suggested Courses:

- ACINTRO: Introduction to Cisco ACI

Course Outline:

Lab Outline

- Lab 1: Discovery
- Lab 2: Troubleshoot Fabric Access Policy
- Lab 3: Troubleshoot Application Profile
- Lab 4: Troubleshoot VMM Domains
- Lab 5: Troubleshoot Layer 2 Out
- Lab 6: troubleshoot Layer 3 Out
- Lab 7: Troubleshooting Contracts
- Lab 8: Wrap-Up

Credly Badge:

Display your Completion Badge And Get The Recognition You Deserve.

Add a completion and readiness badge to your Linkedin profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise
- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through Credly.
